JCB INDIA LIMITED

LETTER OF RECOMMENDATION

To the Admissions Committee,

I am pleased to recommend Mr. Preet Sambare who completed his internship under my supervision at JCB India Design Centre for 2 months during the summer of 2025.

As Deputy General Manager, Operator Environment & Propulsion Systems, JCB India Ltd., I have worked with many aspiring engineers, and Preet distinguished himself through his technical competence, eagerness to learn, and professional attitude. He joined our team during a critical phase of Wheel Loader product development involving design modifications driven by regulatory requirements and field performance feedback.

During his internship, Preet worked with our global Cabs Engineering team, supporting structural design updates, engineering documentation, and validation activities. He contributed to design modifications following virtual analysis and ROPS/FOPS testing, assisted in preparing and releasing drawings through Siemens NX and Teamcenter, and participated in engineering reviews and benchmarking activities. His ability to quickly understand engineering requirements and deliver quality work earned the confidence of the team.

One of Preet's key strengths is his ability to bridge theoretical knowledge with practical engineering application. He was equally comfortable working on CAD models and participating in physical testing, operator evaluations, and ergonomic assessments. This balance of analytical thinking and hands-on problem-solving is an important quality for advanced study and research.

Beyond his technical abilities, Preet demonstrated strong communication and teamwork skills. He collaborated effectively with engineers, technicians, and test personnel, accepted feedback positively, and consistently showed professionalism and accountability. His curiosity, willingness to take initiative, and dedication to continuous learning set him apart from his peers.

I am confident that Preet possesses the academic potential, technical foundation, and work ethic necessary to excel in graduate studies. He will be a valuable addition to any university program, and I strongly recommend him for admission without reservation.

Sincerely,

Abhijit Hodage
Deputy General Manager
Design Centre
JCB India Ltd., Pune, India
